-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Claim Rejections - 35 USC § 112

1. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter that the applicant regards as his invention.

2. Claims 1-17 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Independent claim 1 states “ ... the write head comprises:” , but does not give the specifics of the components.

Independent claims 1, 8, and 13 state an element is coupled; however, there is no mention of what the element is coupled to. There should be another element so that a connection exists between the two elements.

Allowable Subject Matter

3. Independent claims 18 and 22 teach a method of operating a write channel and an article of manufacture comprising a program storage medium, respectively. The distinguishing elements of the claims are: establishing a write stabilization period while remaining in a read mode of operation; transmitting write data when the stabilization period expires; and detecting the write data to cancel the read mode of operation.

Prior Art of Record

4. Prior art of record is provided since it is considered relevant to the applicant's invention. Jiang et al. teaches transitioning from a write state to a read state. Jaffard et

al. also teaches transitioning from a write state to a read state. Yoshinaga et al. teaches a timing circuit with an MR head that achieves a faster operation of the read circuit.
